enquiries@forageplus.com

1. Fill the net

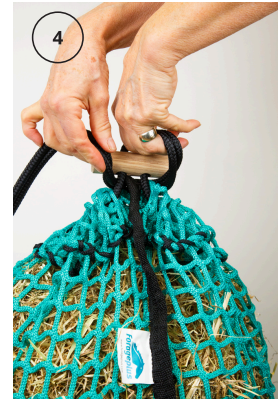

2. Close draw string

3. Push toggle down

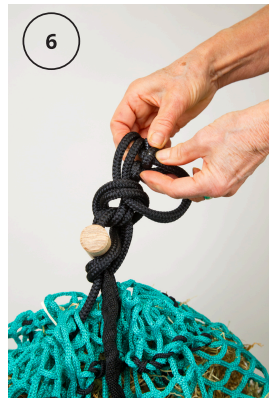

4. Pass the string around back of toggle

5. Pull string through loop to make a slip knot.

6. Put both string ends through the second loop to secure.

7. Secure the carabiner through the metal ring and under one string below the toggle. Do not put the carabiner through the net

8. The net can now be hung from a ring tie. If you want to use it as a hay pillow, with barefoot horses on the ground, then use without the carabiner
